T: estimate calculations

Estimate the answers to these questions.

DO NOT work out the exact answer:

- 1) $21 + 18$
- 2) $64 + 22$
- 3) $42 - 21$
- 4) $78 - 44$
- 5) $28 + 53$
- 6) $98 - 72$
- 7) $102 + 304$
- 8) $304 - 201$
- 9) 18×4
- 10) 52×6
- 11) $99 \div 20$
- 12) $210 \div 9$
- 13) John says that $83 - 27 = 26$. How could you use estimation to quickly tell you that he is wrong?
- 14) A yo-yo costs 99p. Roughly how much will 5 yo-yos cost?
- 15) One bag of sweets contains 17 sweets. Roughly how many sweets will there be in 3 bags?
- 16) Six friends have 62 cards that they agree to share equally. Estimate how many cards each of them will get.
