

Date

T: use vertical addition and subtraction

You can decide whether to use partitioning when you lay out your work, or to leave out the partitioning. Choose the one you find easiest to understand.

Your answer for each question could look like either of these:

With partitioning

$$342 + 256 = 598$$

$$300 + 40 + 2$$

$$\underline{200 + 50 + 6}$$

$$500 + 90 + 8 = 598$$

Without partitioning

$$342$$

$$+ \underline{256}$$

$$598$$

- 1) $74 + 5$
- 2) $33 + 52$
- 3) $46 - 4$
- 4) $76 - 65$
- 5) $24 + 37$
- 6) $92 - 48$
- 7) $452 + 69$
- 8) $221 - 45$
- 9) $745 + 185$
- 10) $554 - 76$

Extension

- 11) $843 + 568$
- 12) $402 - 38$
- 13) $666 + 444$
- 14) $705 - 248$

Date

T: use vertical addition and subtraction

Answers

1) $74 + 5 = 79$

2) $33 + 52 = 85$

3) $46 - 4 = 42$

4) $76 - 65 = 11$

5) $24 + 37 = 61$

6) $92 - 48 = 44$

7) $452 + 69 = 521$

8) $221 - 45 = 176$

9) $745 + 185 = 930$

10) $554 - 76 = 478$

Extension

11) $843 + 568 = 1,411$

12) $402 - 38 = 364$

13) $666 + 444 = 1,110$

14) $705 - 248 = 457$
