

Date T: division as repeated subtraction

Write these subtraction problems as division problems

Example:

$$8 - 2 - 2 - 2 - 2 = 0$$

$$8 \div 2 = 4$$

1) $6 - 2 - 2 - 2 = 0$

2) $25 - 5 - 5 - 5 - 5 - 5 = 0$

3) $40 - 10 - 10 - 10 - 10 = 0$

4) $6 - 3 - 3 = 0$

5) $4 - 4 = 0$

Write these division problems as subtraction problems

Example:

$$15 \div 5 = 3$$

$$15 - 5 - 5 - 5 = 0$$

6) $10 \div 2 = 5$

7) $30 \div 5 = 6$

8) $20 \div 10 = 2$

9) $3 \div 3 = 1$

10) $12 \div 4 = 3$
