

Name _____

Date _____ T: know how cities are usually laid out

London, like many cities, can be divided into the following zones:

On the map draw 3 circles: 1 for the CBD, 1 for the inner city and 1 for the suburbs

Look at the map and match these places in London to the zone they are found in (the first 2 aren't on it):

Place	Zone
Oxford Street	_____
Piccadilly Circus	_____
Islington	_____
Hackney	_____
Ealing	_____
Iford	_____

Date

T: compare the CBD, inner-city and the suburbs

Every paragraph should use at least one connective from EACH box:

However	Yet	But	While	Whereas	Instead	Unlike
---------	-----	-----	-------	---------	---------	--------

Because	Since	As
---------	-------	----

Copy the question into your book as a subheading, and then answer it.

Example

How expensive is land?

In the CBD land is extremely expensive because so many people want to have their businesses in the centre of the city, however in the inner city and the suburbs land is cheaper because there is more of land and they have fewer transport links.

How do people travel?

What is land used for?

How much green space is there?

Who lives there: families or single people?

What is the population density like?

Name: _____

Date

T: compare the zones of a city

In the middle of the city buildings are usually cheaper / more expensive because

On the edges of the city buildings are usually cheaper / more expensive because

In the middle of the city people mainly travel by _____

because _____

On the edges of the city people mainly travel by _____

because _____

In the middle of the city buildings are usually used for _____

because _____

On the edges of the city buildings are usually used for _____

because _____

In the middle of the city there is lots of / not much green space because _____

On the edges of the city there is lots of / not much green space because _____

Young people without children live in the middle of the city because _____

People who have young families live on the edges of the city because _____
