

## Comparing Census Data from Our School to 100 years ago

### Type of Home

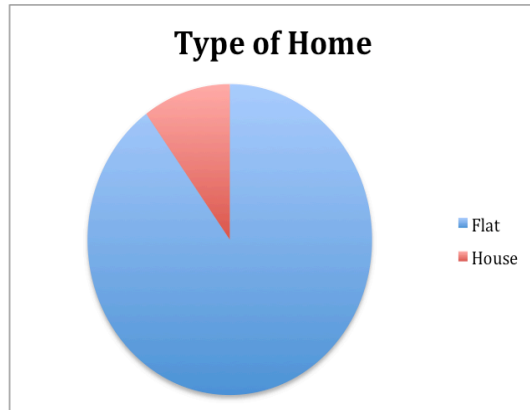

Fig. 1: Type of home for our school today

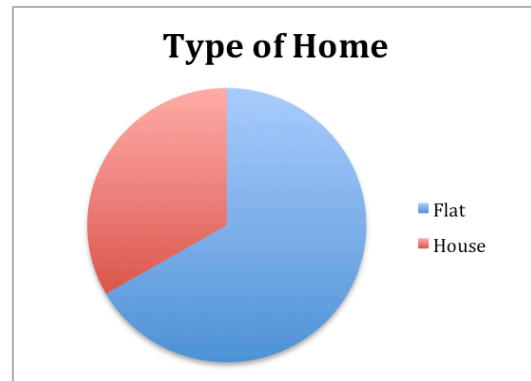

Fig. 2: Type of home for 100 years ago

The pie charts show that most children in our school have always lived in flats, however 100 years ago even more children lived in flats. This may be because people were less wealthy back then and could not afford to buy larger houses, even though most people 100 years ago had larger families.
