T: edit and improve writing

Rewrite these paragraphs so that they sound more interesting by:

- V - using a thesaurus to replace simple words
- C - using connectives to join sentences
- O - using connectives and to open the sentences
- P - using a wider range of punctuation

Metal

Metal is hard. It is used to make things like planes. It is good for making things that aren't supposed to let water through. It is waterproof. It rusts. Some types of metal like steel and iron are magnetic. Most other types of metal aren't magnetic.

Plastic

Plastic comes in many different colours and is a man-made material so it doesn't grow out of the ground like wood and it is used for making bottles and it is normally smooth but it can be rough and it can be transparent (see through) but it can also be opaque (not see through) and it is usually strong

Fabric

Fabric is soft. It is softer than other materials. It is comfortable. Some types of fabric are wool and cotton. there are lots more different types and fabric is flexible which means it can be bent and some fabrics are smooth but other fabrics are rough

Now make up your own paragraphs about glass, stone and wood.
