

Name _____

Date

T: use connectives correctly

For each sentence you need to fill in the missing word with a connective from the box.

If you aren't sure what some of the words mean look at the list of definitions on the other sheet.

and	but	because	so
-----	-----	---------	----

You should use each connective in the box twice.

- 1) Marble is used for floors _____ it can be highly polished so that it looks great.
- 2) Some rocks are made from cooled down lava, _____ not all rocks are made this way.
- 3) One type of rock is igneous _____ another type of rock is sedimentary.
- 4) Steps can be made from granite, which is hard, _____ that they don't wear away easily.
- 5) Roofs could be made from pumice, _____ they would let the rain in because there are holes in pumice.
- 6) Chalk cliffs are soft _____ big, powerful waves are able to erode (break) them.
- 7) Slate is used for making roofs _____ it is waterproof and easily splits into layers.
- 8) Chalk is soft _____ is often white in colour.

Now make up sentences of your own about rocks. Remember:

- use a different connective in each sentence
- use the information on your other sheet and what you have learned in science

Name _____
